

LADYVET ANIMAL HOSPITAL

Dr. Vicki is our sole veterinarian here at Ladyvet Animal hospital. She graduated from Michigan State University of Veterinary Medicine in 1980. She purchased Ladyvet Animal Hospital in 1996 and started her full-time career in small animal medicine at that time. Dr. Vicki has brought several new technologies to the Ladysmith area including laser surgery, therapy laser, digital dental x-ray, an otoscope with a camera so clients (along with the doctor) can see what is going on in their pets ears, in-house laboratory for blood and urine analysis, high-speed dental unit and ultrasonic scaler for dentistry. Dr. Vicki tries to keep up with the leading edge of small animal diagnostics.
